## You take care of your bike. Take care of your truck, too.

You need your truck to get your bike to the trail or motocross track. Don't let a problem with your pickup ruin a weekend of riding; perform the maintenance necessary to keep it in prime condition. AMSOIL synthetic lubricants are designed to withstand the harmful effects of towing and hauling – extreme heat, wear, harmful deposits – better than other oils. AMSOIL synthetic lubricants deliver outstanding protection for your bikes and the vehicles that tow them.

Maximum horsepower, bullet-proof wear protection and consistent clutch feel give you the confidence to get on it, get after it and stay out front.

It takes confidence to grab the holeshot during a race or get out in front of the pack on the trail – confidence that your bike will respond the way you want and confidence that you can push it to the limit without fear of breakdowns. AMSOIL synthetic lubricants are durable and reliable. They are designed to maximize the performance of both bike and rider.

## Four-Stroke

### AMSOIL Synthetic Dirt Bike Oil

Clutch slippage or inconsistent clutch feel can lead to slow starts out of the gate and ineffective riding on the trail. Holding a bike steady while waiting for the gate to drop requires a motor oil with the correct frictional properties to prevent the clutch from slipping or grabbing. On the trail, riders often modulate the clutch to keep the engine within the power band, increasing the opportunity for the clutch to slip or grab if low-quality lubricants are used.

AMSOIL Synthetic Dirt Bike Oil is formulated with superior friction-durability properties to deliver consistent clutch feel and long clutch life. Hours of testing in AMSOIL chemical and mechanical labs resulted in a lubricant engineered to maximize your bike's performance. Testing with professional teams in Monster Energy Supercross, AMSOIL Arenacross and AMSOIL GNCC helped further fine-tune AMSOIL Synthetic Dirt Bike Oil for outstanding wear protection and consistent clutch feel. AMSOIL Synthetic Dirt Bike Oil delivers the confidence and performance you need to get on it and get out front.

- Delivers confidence in clutch feel
- Superior protection against gear wear
- Outstanding shear stability for long-lasting performance

## Two-Stroke

### AMSOIL DOMINATOR® Synthetic 2-Stroke Racing Oil

High-performance and race-designed two-stroke engines operate under severe conditions. High heat can quickly burn off light oils and cause rapid piston expansion, decreasing piston-to-cylinder-wall clearances and increasing the likelihood of piston scuffing and seizure. High pressure can exceed the film strength of low-viscosity oils, which promotes crankshaft bearing wear and pitting.

DOMINATOR is purpose-built for outstanding film strength and lubricity. It is engineered with carefully selected, higher-viscosity synthetic base oils to withstand the high heat and pressure common to high-performance and racing applications. DOMINATOR's anti-friction chemistry is race-proven to provide an extra measure of protection against piston scuffing and bearing wear.

- Outstanding piston and bearing protection
- Maximizes power

### AMSOIL Quickshot®

Degraded fuel presents major problems for dirt bike engines. It can form varnish, gum and insoluble debris that clog carburetors, fuel injectors and fuel filters. Carbon buildup can form on the tops of pistons, causing pre-ignition, rough idling and poor throttle response. AMSOIL Quickshot is formulated to thoroughly clean and restore peak performance in dirt-bike fuel systems. Its revolutionary technology addresses problems associated with ethanol, water and dirty pump gas.

- Fights ethanol-related problems
- Cleans varnish, gum and insoluble debris
- Stabilizes fuel between uses & during short-term storage

### AMSOIL Motorcycle Octane Boost

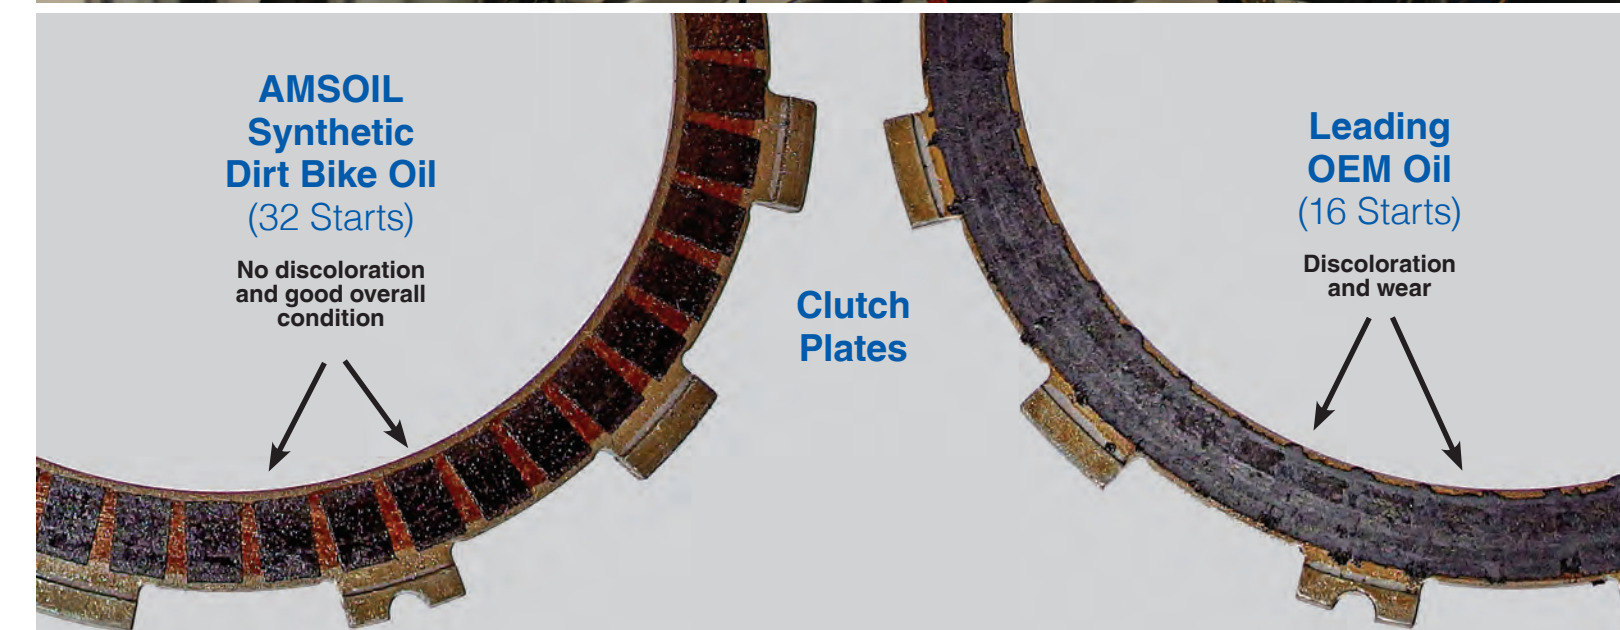

- Increases octane up to 3 numbers
- Improves startup performance
- Designed to increase power

### AMSOIL Suspension Fluid

- Controls friction & heat
- Limits shock fade and inconsistent dampening
- Light #5: Quick rebounds under extreme temperatures
- Medium #10: More dampening & slower rebounds

### AMSOIL Metal Protector

- Lubricates and protects metal surfaces
- Disperses water
- Penetrates existing rust build-up

## EXTREME SIMULATED-START TEST

### How Does AMSOIL Synthetic Dirt Bike Oil Stand Up?

In an extreme simulated-start test, AMSOIL Synthetic Dirt Bike Oil continued to deliver consistent clutch feel following 32 simulated race starts, while a leading original equipment manufacturer (OEM)-branded oil demonstrated inconsistent clutch-lever action and poor clutch feel after 16 starts. The clutch plates lubricated with AMSOIL Synthetic Dirt Bike Oil remained clean and in good overall condition, while the plates using the OEM oil revealed discoloration and wear. AMSOIL Synthetic Dirt Bike Oil's superior performance delivers the confidence that your bike will perform consistently in all types of riding conditions.
